

Butterflies

We are butterfly
eggs. Inside us
there is a
caterpillar.

Time for me to come
out! I'm hungry...

What shall I eat?
Let me eat my egg
case first.

Yummy! Mummy put
my eggs on these
delicious leaves. Let
me eat them.

I ate so
many
leaves!
Now I am
fat and it
is time to
change.

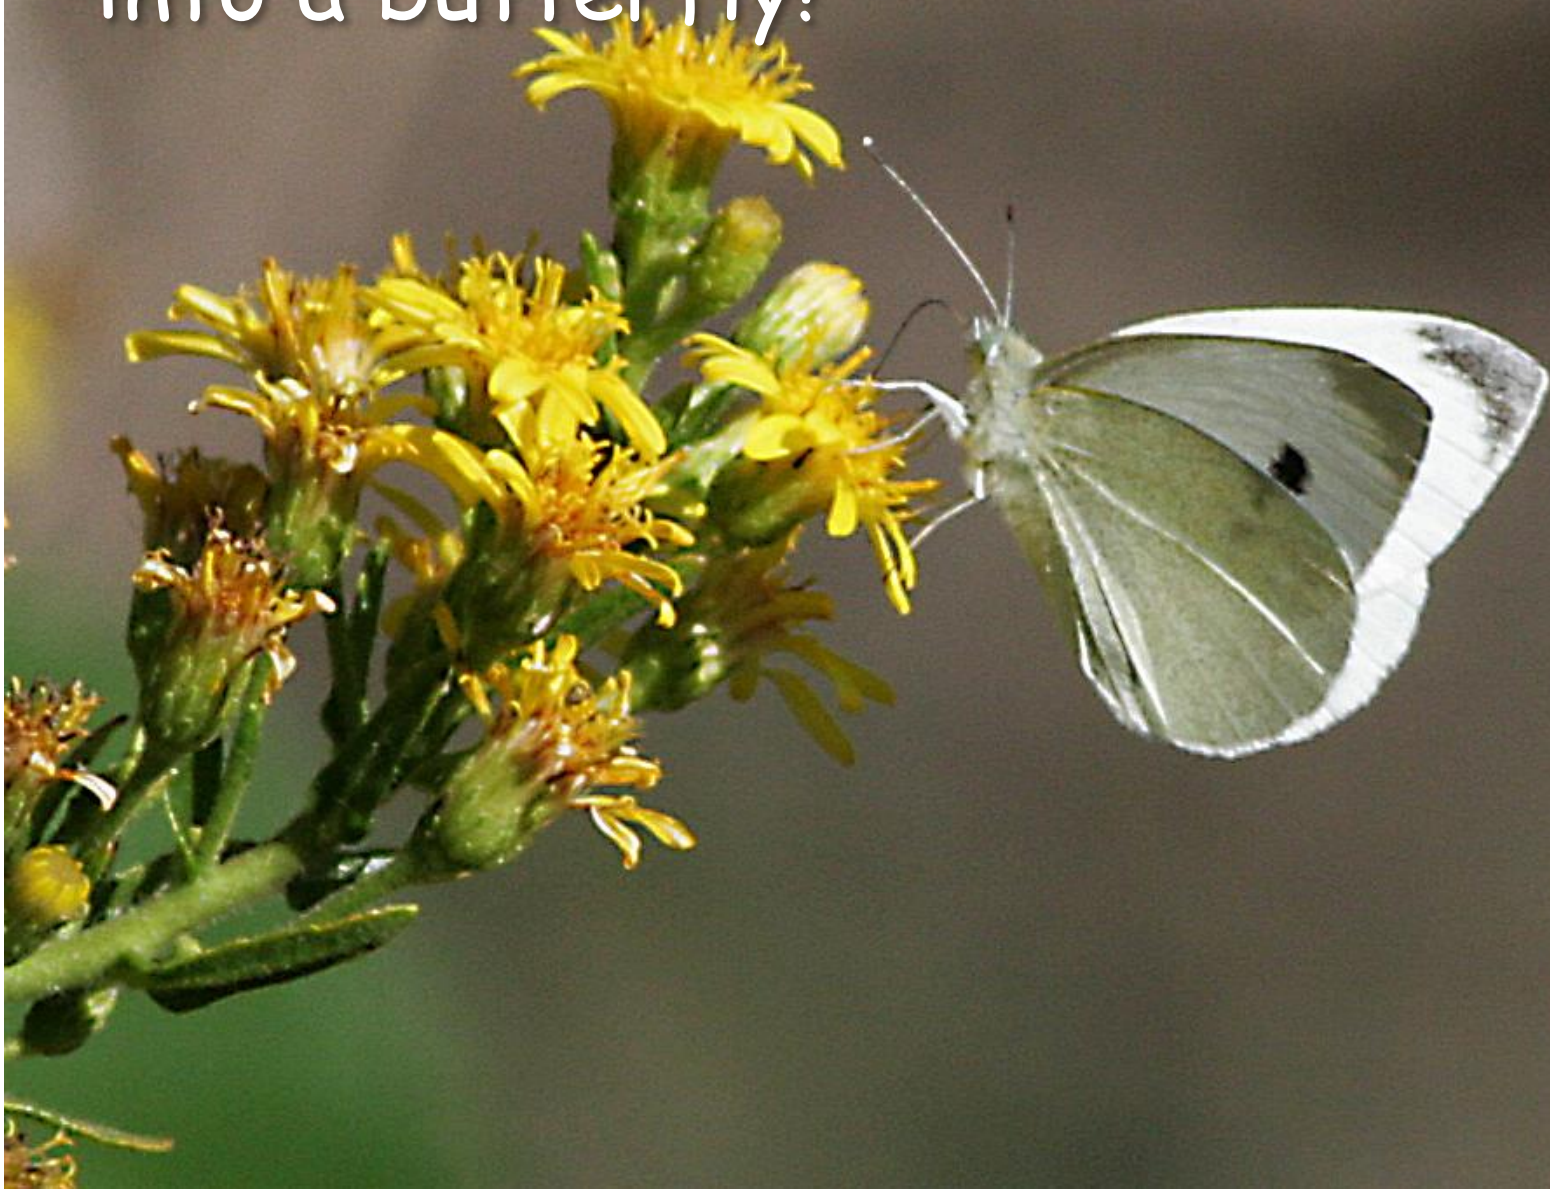

Let me find
somewhere nice
to make a pupa.

Don't touch my pupa
please. I am changing
inside it!

Ready! Do you like me? I changed
into a butterfly!

Now I can't eat
leaves. I need
to
find flowers
to drink their
sweet juice.

It's time for me to start a family
and lay eggs to
grow into caterpillars.

I must find the right plant to lay my eggs on. Every butterfly has a special plant.

Here are some of them...

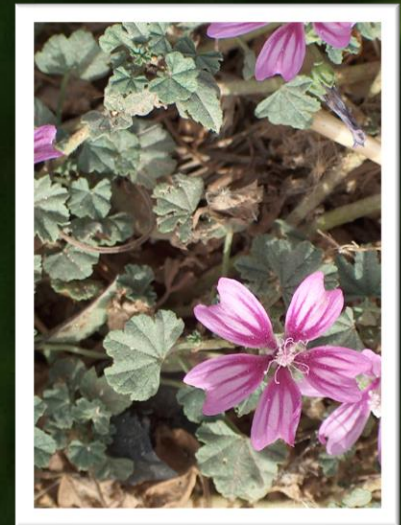

The caterpillar of the
SWALLOWTAIL eats
Fennel leaves

The caterpillar of the COMMON
BLUE eats Trefoil leaves.

The caterpillar of the
PAINTED LADY eats
Thistle and Mallow leaves.

The caterpillar of the
RED ADMIRAL
eats Nettle
leaves.

When you are in the countryside,
remember to look for butterflies and
caterpillars!
