

Nature Quest

Here are the
answers to the froggy
questions!

Question 1

A frog is called an amphibian. Why?

Answer

A. Because it breathes in water and out of water.

To breathe out of water the frog has two lungs just like us.

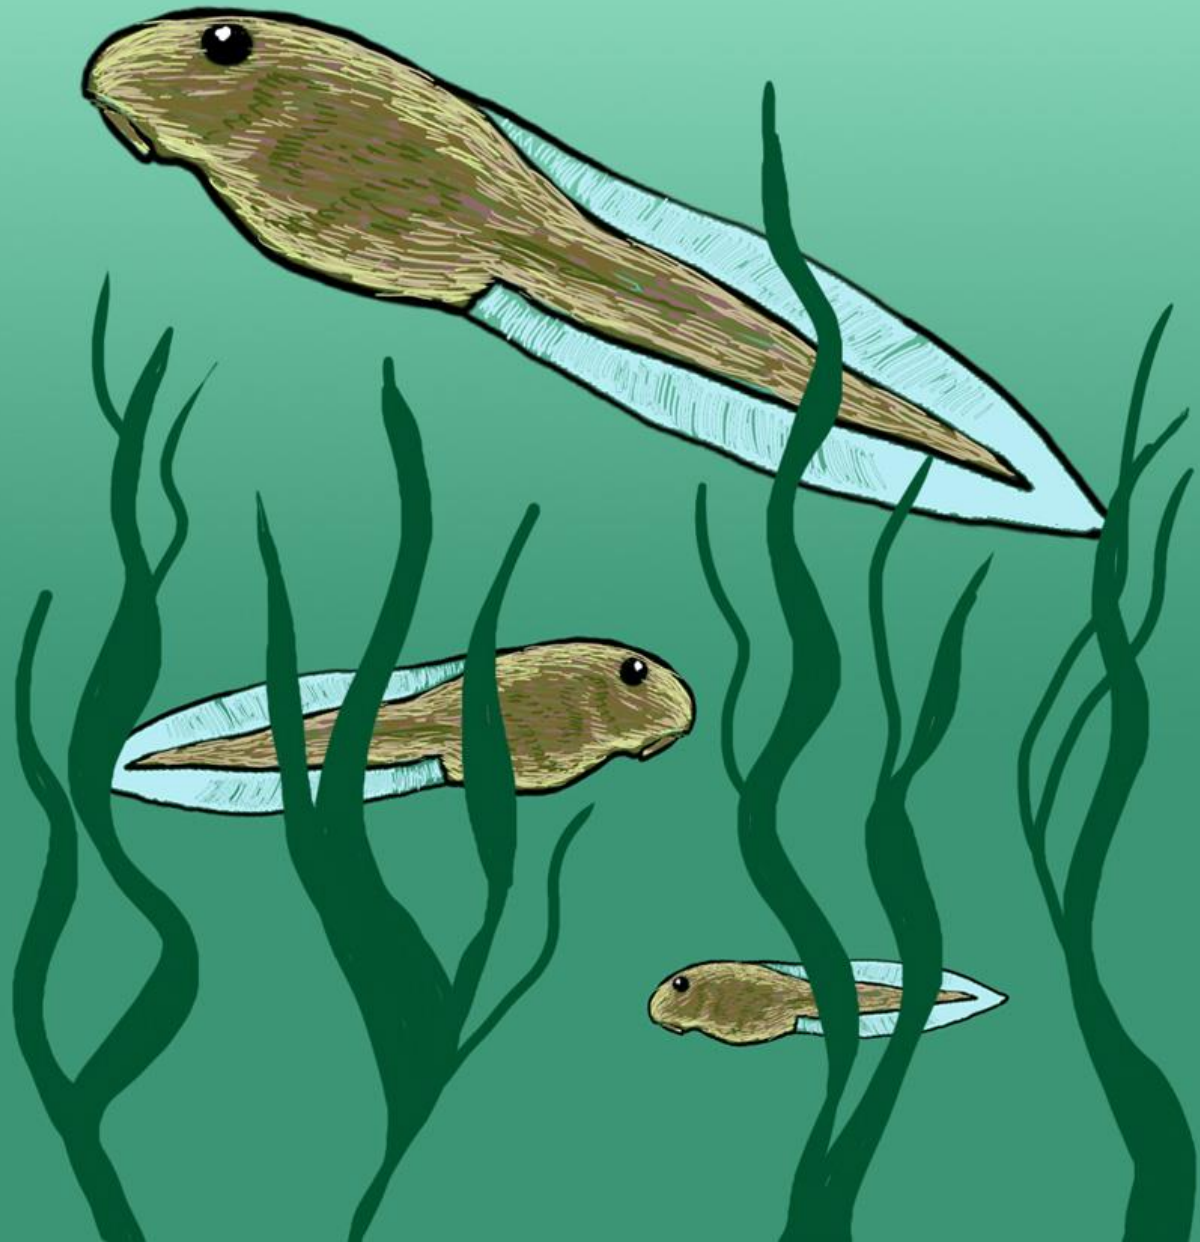

Under water the frog breathes through its skin.

Question 2

What do we
call a baby
frog?

Answer

B. A tadpole.

Question 3

What do
frogs eat?

Answer

A. Insects.

Question 4

Where do
frogs live?

Answer

C. Near
fresh water.

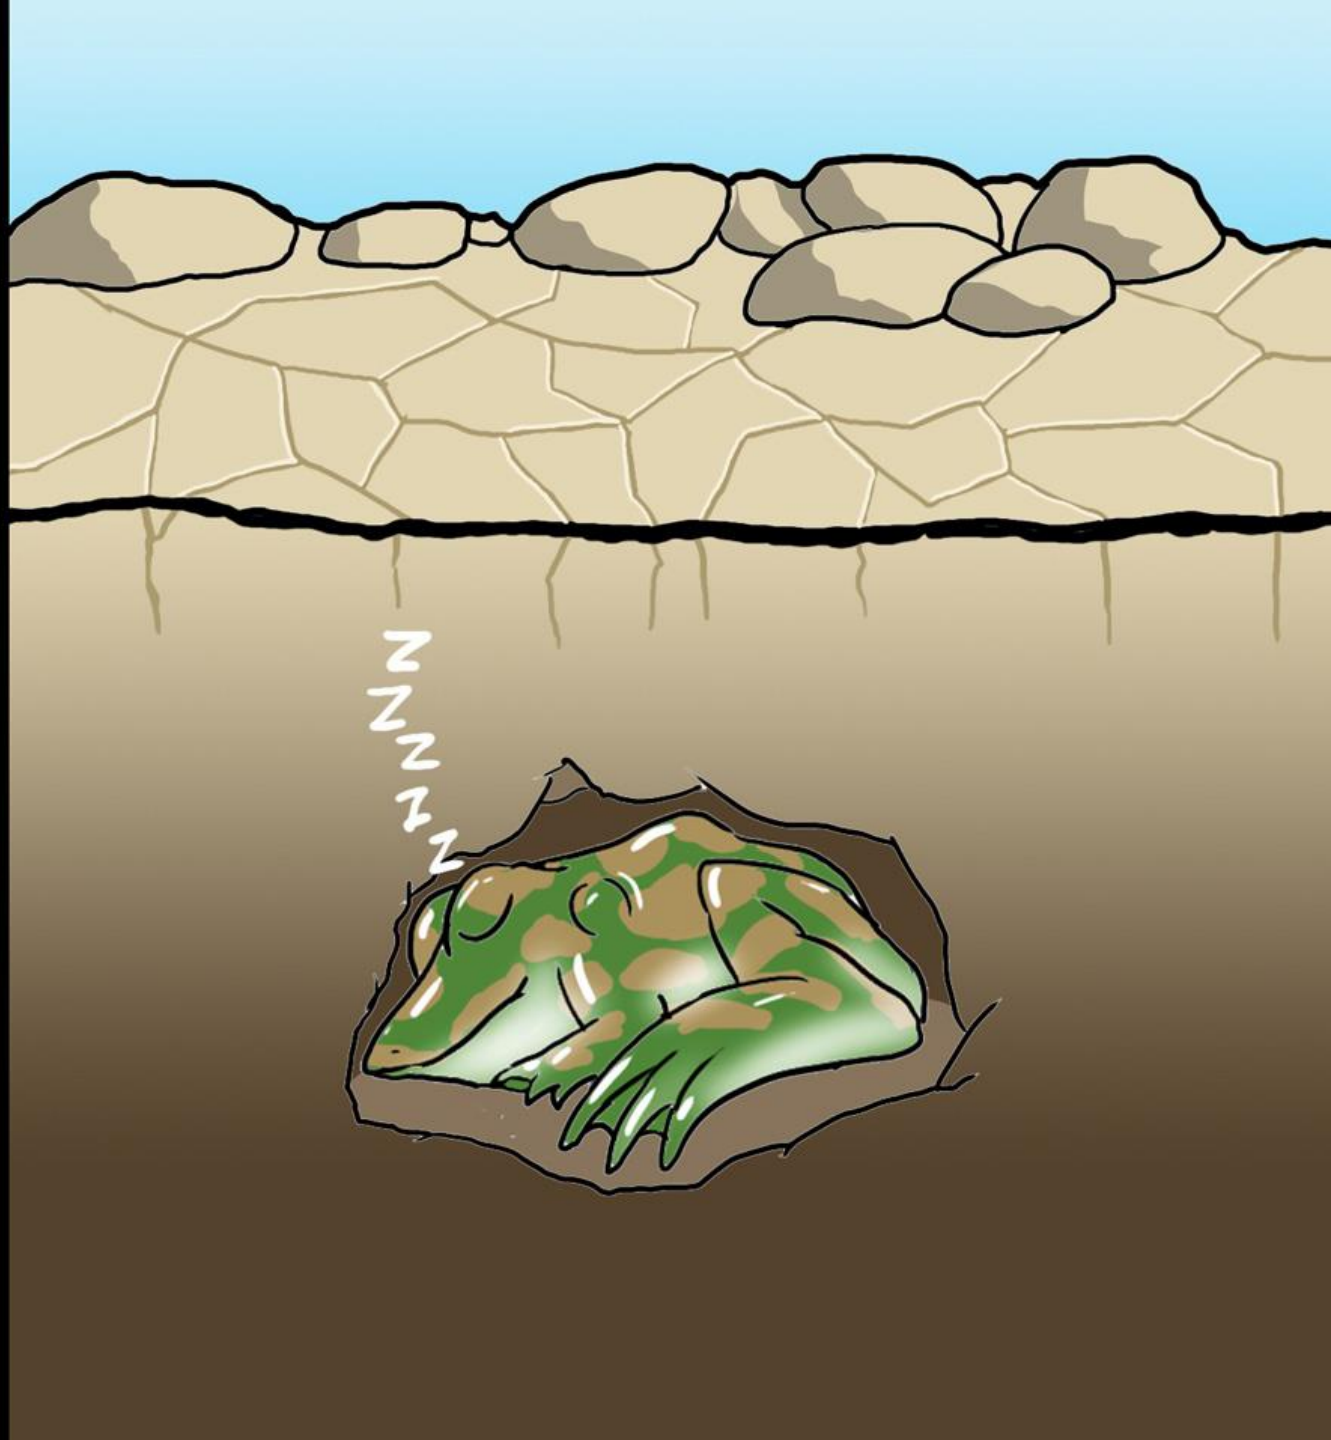

Question 5

What do frogs do when it's dry in summer?

Answer

B. They dig holes in the mud.

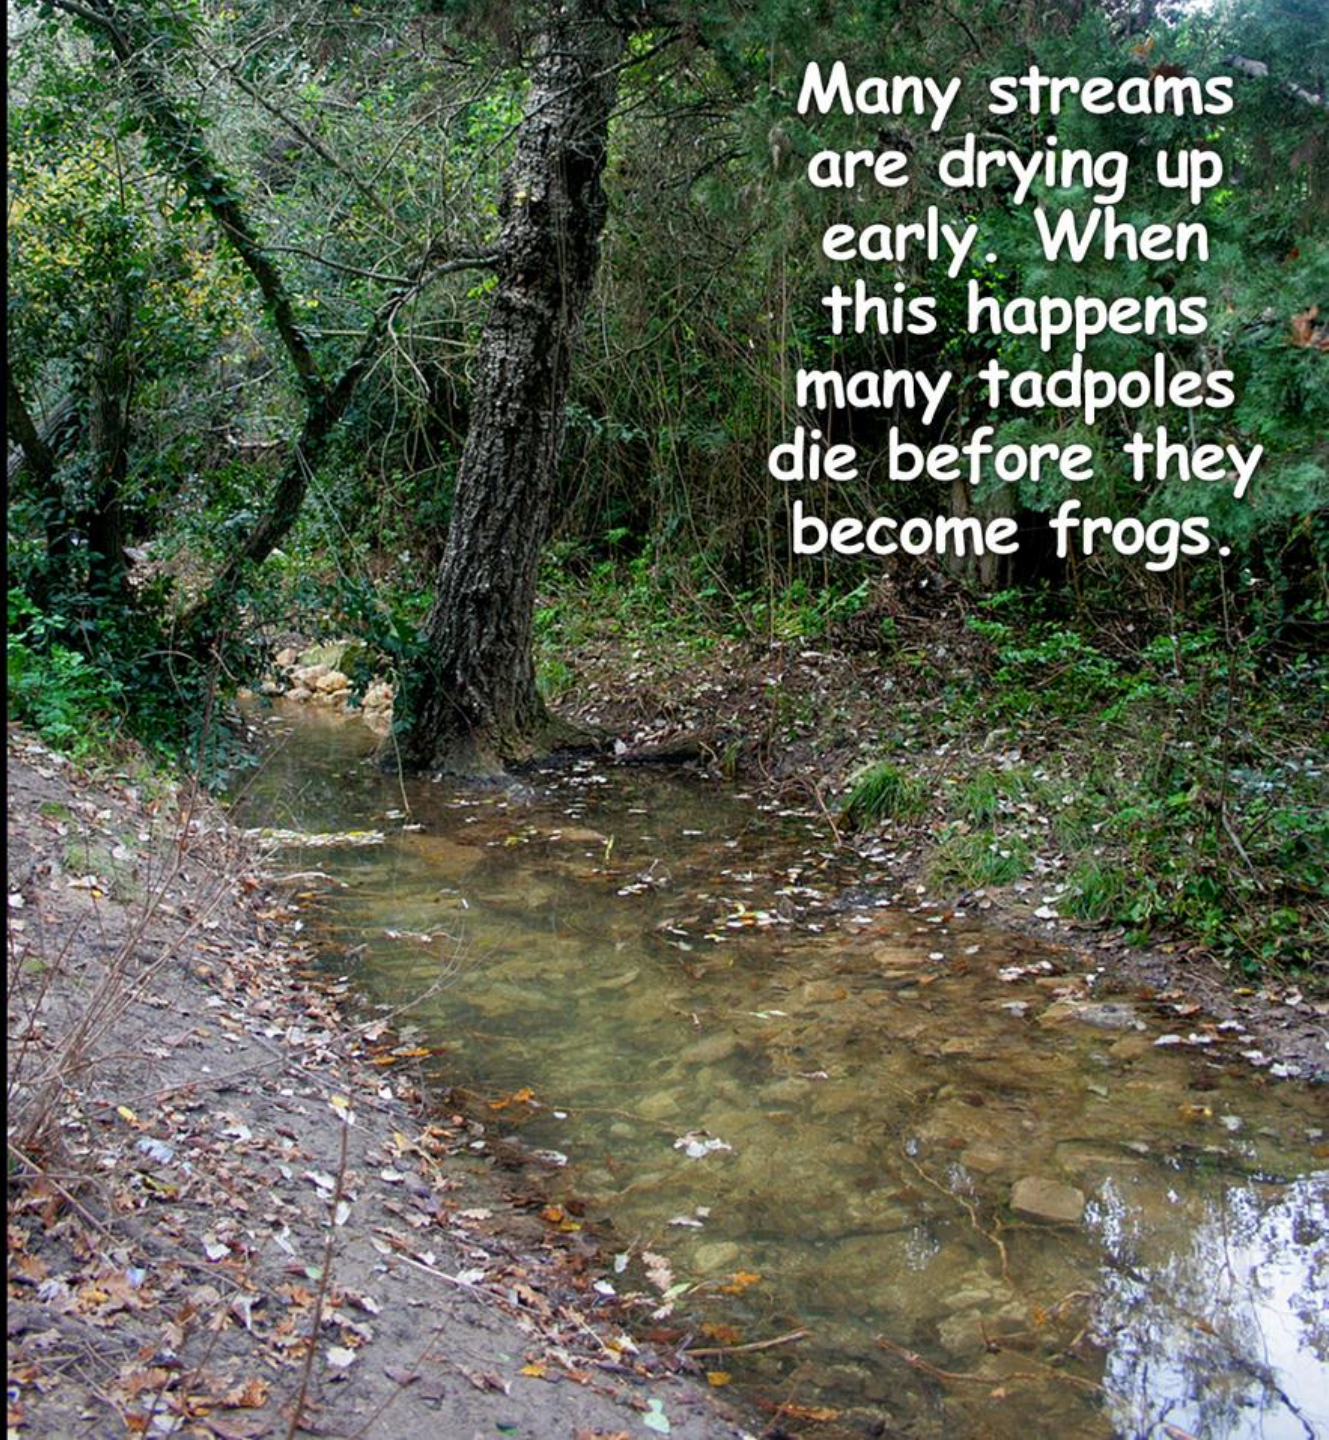

Question 6

Why are frogs getting rare in Malta?

Answer

C. Because their habitat is drying up.

Many streams are drying up early. When this happens many tadpoles die before they become frogs.

Question 7

If you see a frog in nature what do you do?

Answer

C. Leave it where it is.

A frog's place is in its habitat,
not in people's homes.

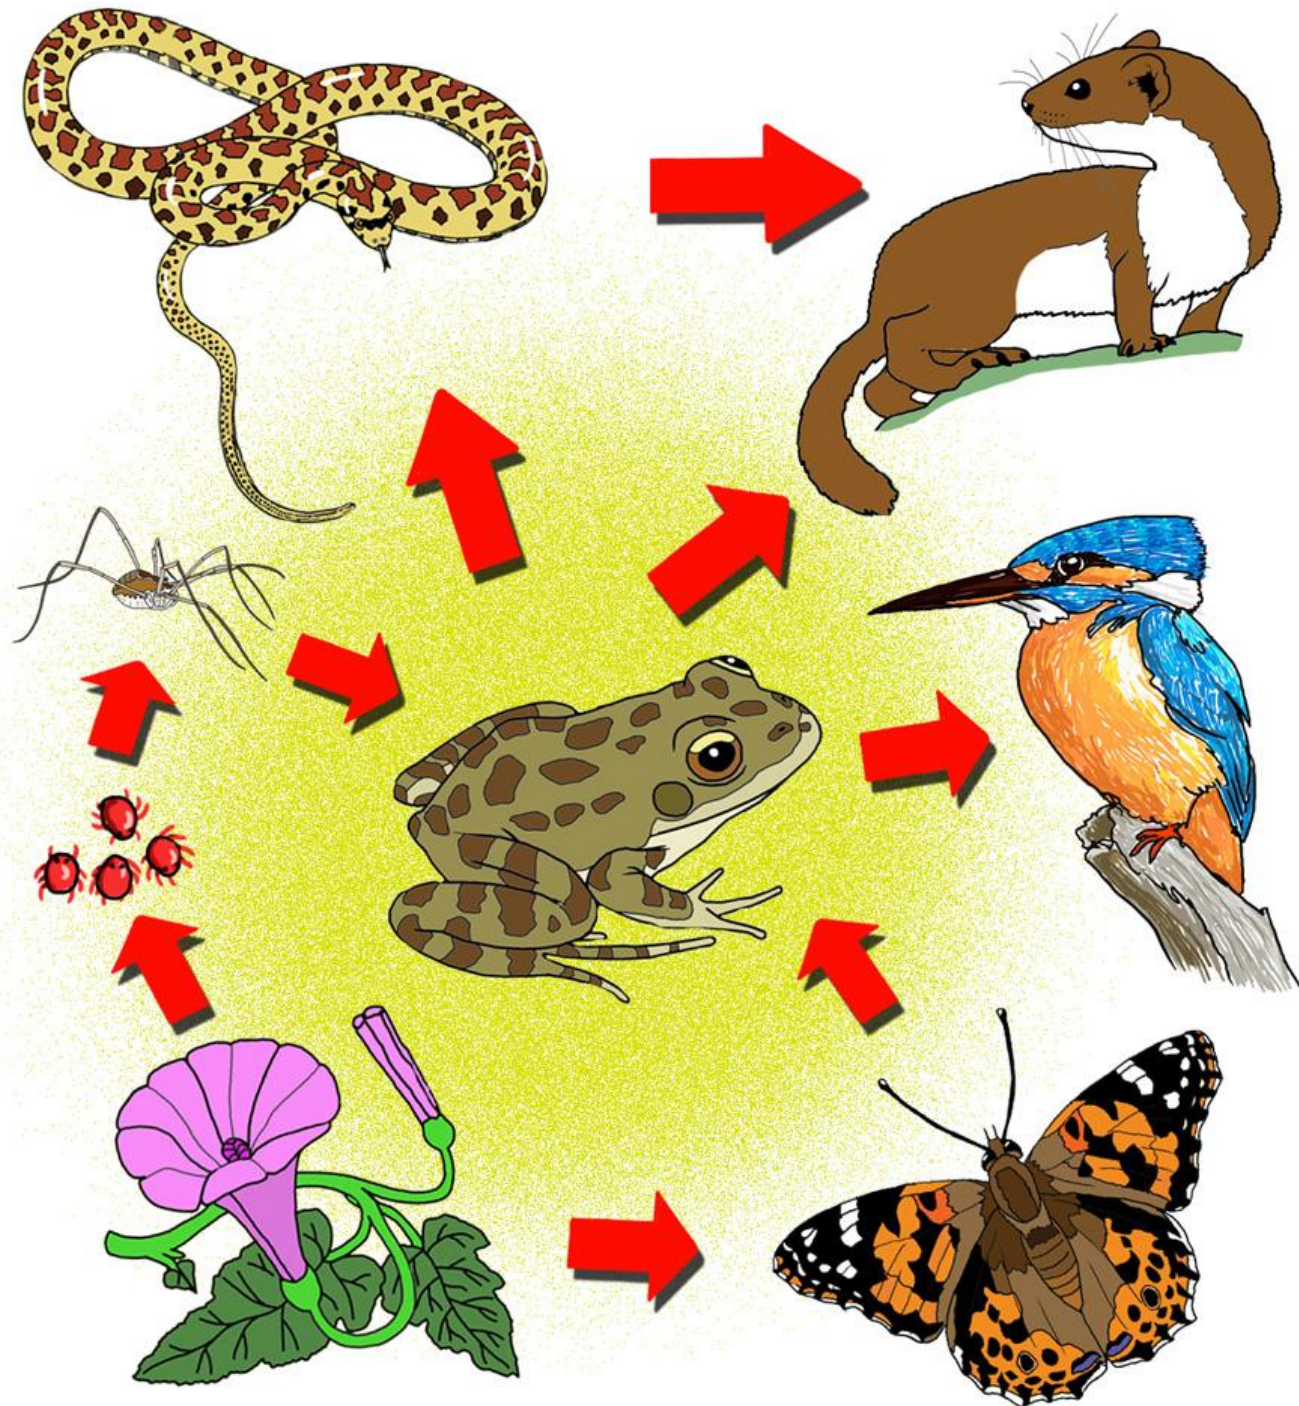

Frogs are
protected.
It's illegal to
catch them.

Question 8

Why are frogs important in nature?

Answer

A. Because they are part of the foodchain.

Now that you have learned
so much about me, make
sure you tell everyone all
about frogs. Bye!
