Ħbieb naturalisti...

mill-editur

U waslet biex tispiċċa sena oħra. Ċaw ċaw 2021!

Meta tasal sena ġdida ħafna nies jagħmlu wegħda li jaqtgħu xi vizzju. Min jgħid ħa jirqaq, min jgħid ħa jaqta' s-sigaretti, min jgħid li ħa jistudja iktar. Dawn ngħidulhom *new year's resolutions*.

Jien qtajtha li ħa noħroġ iktar fin-natura. Mhux biss, imma ħa nitgħallem l-isem ta' 12-il pjanta ġdida. Waħda kull xahar! Imbagħad irrid naqra, nistaqsi u nitgħallem iktar fuq kull waħda. Ħalli meta noħroġ fin-natura nibda nagħrafhom. Qishom ħbieb ġodda.

Victor Falzon

U nżidhom mal-lista ta' ħbieb naturali li diġà għandi. Għasafar, insetti, fjuri, rettili, siġar, brimb, ħut. Ħbieb kull fejn inħares!

Ħaġ'oħra li rrid nagħmel hi li nħawwel 12-il siġra. Imma dawn mhux ħa nħawwilhom waħda fix-xahar għax mhux kull staġun tajjeb għat-taħwil. Tafu liema hu l-aħjar staġun biex tħawwel is-siġar? **Ix-xitwa!** Jiġifieri issa!

B'hekk sa ma tasal in-nixfa tas-sajf is-siġar żgħar ikunu laħqu ħadu ftit xita u l-għeruq tagħhom ikunu draw l-art fejn tħawlu.

Titħajru tagħmlu bħali? Fil-każ iktbuhom f'paġna 14 ħalli ma tinsewx!

Nawguralkom Milied sabiħ bla ħafna ħela, u nixtiqilkom sena ġdida mimlija saħħa u daħq u natura u tagħlim.

U issa ħa mmur infittex dik l-imgħażqa...

Victor

Kuċċarun biċ-ċurkett!

David Attard

Kmieni f'Diċembru, żewġ **paletti** l-ġmiel tagħhom niżlu jistrieħu fir-riserva naturali tal-Għadira. Il-paletta hija tajra spettakolari, speċjalment b'dak il-munqar qisu kuċċarun!

Waħda miż-żewġ paletti kellha ħaġ'oħra interessanti. Ma' sieqha lkellha ċurkett abjad li bit-tromba stajna naqrawlu n-numru. Minn dak in-numru, il-BirdLife sirna nafu li dik il-paletta faqqset f'April 2017 fil-Camargue, riserva naturali kbira fin-naħa t'isfel ta' Franza!

Il-paletta (*Eurasian spoonbill*) hija għasfur tal-passa, u waqt li jpassu dawn l-għasafar jegħjew u jaqbadhom il-ġuħ. Għalhekk waqt il-vjaġġ twil tagħhom ifittxu postijiet fejn jinżlu jistrieħu u jieklu xi ħaġa.

Għalhekk ir-riservi naturali tagħna huma tant importanti għall-għasafar, allavolja żgħar.

Niżlet tistad...

Kmieni f'Novembru fir-riserva tal-Għadira niżlet **arpa** fil-baxx fuq l-ilma. L-arpa (*osprey*) hija tip ta' ajkla li tiekol il-ħut, għalhekk bdiet iddur fuq l-għadira tgħarrex l-ilma b'għajnejha; darba anke għodsot fl-ilma u telgħet tferfer ir-rix. Imma bħalissa fir-riserva bużaqq biss hemm, li żgħir wisq biex jinteressa lil din it-tajra kbira. Għalhekk wara li straħet ftit fuq gżira żgħira fir-riserva, l-arpa taret u ġibdet lejn il-park tal-Majjistral.

U kull min kien hemm dakinhar u ra dan l-ispettaklu nduna li kien nesa jieħu n-nifs!

Dragun ġdid!

Il-mazzarelli (*dragonflies*) huma insetti b'saħħithom, ikkuluriti u wħud minnhom kbar ukoll. Jgħixu l-iktar fejn hemm l-ilma ħelu, għalhekk f'Malta ma tantx hawn ambjent għal qalbhom wisq. Imma xorta waħda għandna lista ta' xi 20 speċi. U kull tant snin titfaċċa speċi ġdida.

L-iktar wieħed ġdid huwa l-**mazzarell tal-Magreb** (orange-winged dropwing *Trithemis kirbyi*). Lemħu l-ewwel darba seħibna Charles Gauci f'Mejju 2020, f'wied bl-ilma ħdejn l-Imselliet. B'xorti tajba Charles kellu l-kamera għal-lest u b'hekk seta jagħrfu u jiċċekkjah aħjar mir-ritratti. Tliet xhur wara reġa' ra ieħor, din id-darba f'Wied il-Qlejgħa. Prosit Charles.

Kemm għamlet xita! U kemm fraħt għax tgħidx kemm għandi ħajja fil-ġnien. Dan l-aħħar skoprejt xi ħaġa ġdida wkoll: kont qed ninnota kemm tela’ tfief fil-qsari u fil-ħamrija li nħalli għall-pjanti selvaġġi. It-tfief inħobbu għax jagħmel fjuri fil-ħarifa, fix-xitwa u fir-rebbiegħa u ħafna insetti jiġġennu għall-fjuri tiegħu.

Jiena u nħares lejn it-tfief, fuq werqa nnutajt xi ħaġa badja. Ħarist iktar mill-viċin u rajt disinn abjad iserrep ma’ wiċċ il-werqa. Tgħid min qagħad jimxi żigużajg ipinġi linja bajda qisha tiżjina fuq il-werqa?

Mort għall-kamera u ħadt ritratti tal-werqa minn fuq u minn taħt biex nara aħjar fuq l-iskrin tal-kompjuter, forsi niskopri min kien l-artist. Kif kabbart ir-ritratti tan-naħa ta’ taħt tal-werqa malajr ħadt it-tweġiba: dak iż-żigużajg kien kanal irqiq minn fejn kien għadda annimal! U hemm kien l-annimal – fit-tarf taż-żigużajg. Tant kien żgħir li kien qed jgħix fil-ħxuna tal-werqa, u filwaqt li jiekol il-meraq aħdar tal-werqa, kien ħaffer mina huwa u għaddej. Dawk kienu d-‘disinji’ li rajt!

Meta fittixt dwar x’annimal seta’ kien, tgħallimt li hemm tip ta’ baħrijiet żgħar li jbidu fil-weraq. Meta l-bajd ifaqqas joħroġ ix-xagħat, jiġifieri d-dudu. Dawn jgħidulhom *leaf miners*, għax iħaffru l-mini fil-weraq. Ix-xagħat jibqa’ jgħix u jħaffer fil-werqa sakemm jikber. Meta jkun lest jagħmel fosdqa u wara ftit żmien mill-fosdqa toħroġ il-baħrija lesta!

Mur obsor dan kollu jkun qed jiġri fil-ħxuna ta’ werqa!

sar-riserva tas-Salina?

Aron Tanti

Is-Salina hija waħda mill-erba' riservi naturali li tieħu ħsiebhom il-BirdLife. Is-Salina hija interessanti s-sena kollha, imma fix-xitwa jkun hemm ruxxmata gawwi li jużaw is-salini biex jorqdu, jistkennu mill-maltemp, jistrieħu, jitbaħbħu fis-salini baxxi, u jgħidu kelma. U dawn biex jitkellmu... jgħajtu koċċ!

Maltese Seabirds

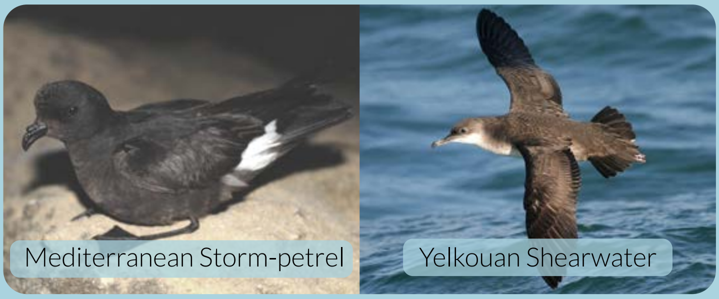
Seabirds are birds that spend their life at sea or near it. Malta is home to three protected seabird species, the Mediterranean Storm-petrel, the Yelkouan Shearwater, and Scopoli's Shearwater.

The **Mediterranean Storm-petrel** is Malta's smallest seabird. It can be found in Sicily and the Balearic Islands, however the largest estimated breeding colony, which accounts for around half the Mediterranean population, is found in Filfa.

The orange area shows the Marine Protected Areas which are important for **seabirds**

Native to the Mediterranean Basin, the **Yelkouan Shearwater's** may be found in Greece, Italy and the south-eastern cliffs of Malta, Comino and Gozo.

Their wingspan is around 85cm, and they have a slender black beak that is hooked at the tip, black upperparts, and a whitish bottom.



Mediterranean Storm-petrel | Yelkouan Shearwater

Malta is also home to **Scopoli's Shearwater,** with Gozo being host to the largest local colony**.** The shearwaters' wingspan is around 120cm and has a white underside with a dark trailing edge, and a yellowish bill. They are often seen following fishing boats for food.

At night they give off a very particular call which resembles a baby's wailing cry. Following breeding season, this species flies out into the Atlantic along West Africa. Interestingly these shearwaters tend to gather in large groups called 'rafts' close to the coast at sunset before returning to their nests in the dark.

Special Protection Areas forming part of the Natura 2000 network have been designated in Malta to ensure the survival of these protected seabirds.

The **yellow-legged gull** is the biggest bird that nests in Malta. Many of them nest on tiny Filfla, where they feel safe from people. Young gulls have lots of brown feathers, the grown-ups are white and grey.

Let's help **birds** this winter. Let's build them a **bird table**...

Art by Victor Falzon

You will need

1 piece of plywood about as big as this page (30cm x 20cm)

2 thin wooden strips 24cm long

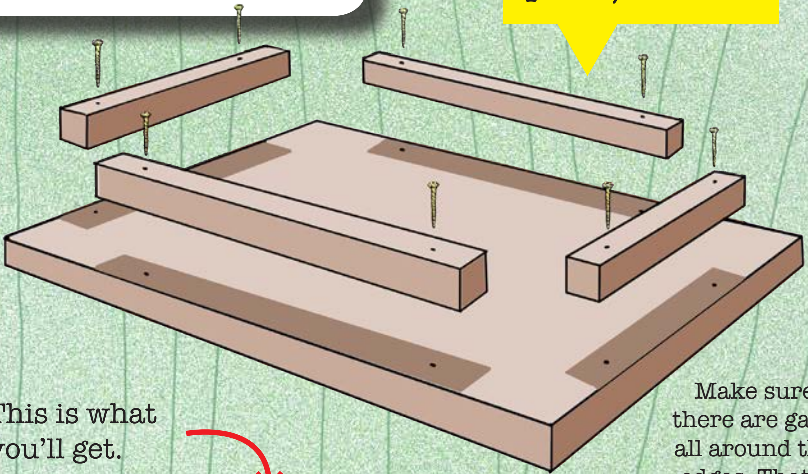
2 thin wooden strips 15cm long

1 small cube of wood about 5cm, with a round hole (2.1cm wide) in the middle.

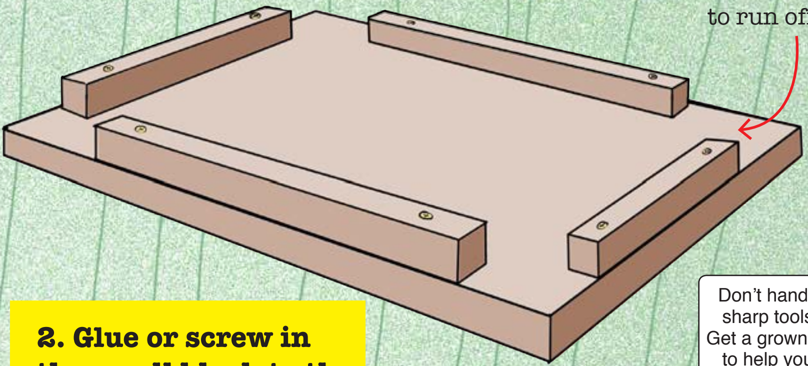
1 broomstick

Screws, nails, glue

1. Screw the strips of wood around the edges of the plank, like this.



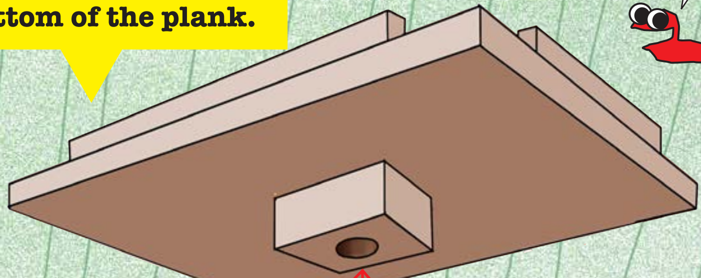
This is what you'll get.



Make sure there are gaps all around the edges. That's for rainwater to run off.

Don't handle sharp tools. Get a grown-up to help you.

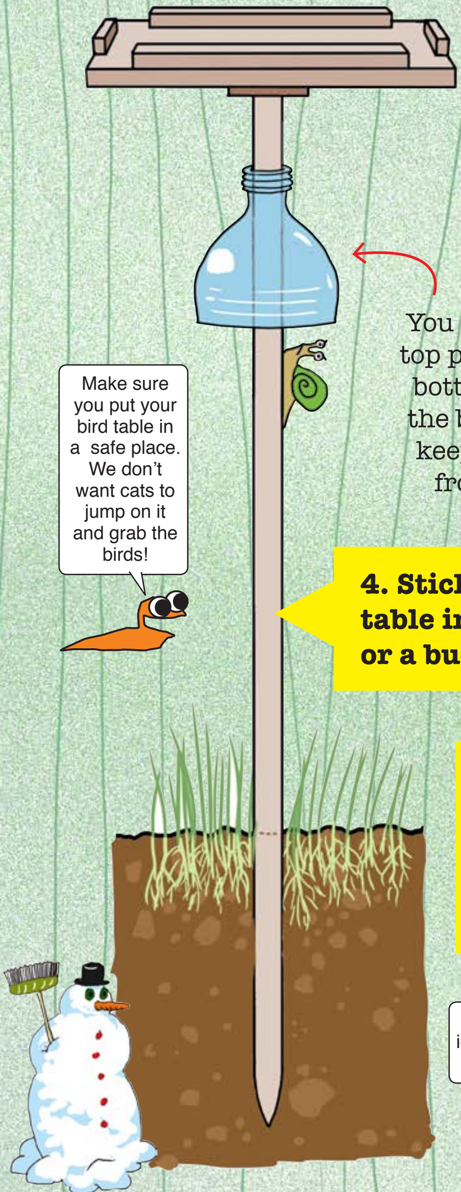
2. Glue or screw in the small block to the bottom of the plank.



Make sure it's in the middle.

3. Push one end of the broomstick into the hole.

If you put sticky or messy food, make sure you clean the bird table later.



You can wedge the top part of a plastic bottle halfway up the broomstick, to keep snails away from the food.

Make sure you put your bird table in a safe place. We don't want cats to jump on it and grab the birds!

4. Stick your bird table into the ground or a bucket of sand.

5. Sprinkle some nice food for the birds. Biscuit crumbs, seeds, rice, bits of fruit.

Bread is not a good idea because it swells up in their tummy

Oh thank you thank you thank you!

Go to page 7 to see what birds can visit your bird table

FOR A MORE SUSTAINABLE CHRISTMAS!

MALTA NATIONAL AQUARIUM

Have you ever thought that Christmas and the ocean are actually related? During Xmas celebrations we produce a lot of plastic waste which can end up in the ocean! The whole production and transport of new objects also emit lots of CO_2 in the atmosphere, contributing to climate change. So, here are some tips to reduce your Xmas impact this year.

No more producing from virgin natural resources! When buying gifts, focus on charity shops and second-hand items. Or else just buy local or even make your own gifts, like a delicious jam in a reused glass jar!

You can also use flowers, sticks, leaves and newspaper to decorate your gifts and house! Or what about restyling some old fabrics or clothes you have at home, cutting them into nice and personalized gift wraps?

Meet the ocean's Christmas tree!

This cute little thing might look like a tree, but it's actually an animal! Known as the Christmas tree worm, it is an invertebrate, specifically a marine worm that builds a tube in coral reefs. The worm itself is around 4 cm and hides inside the tube, and the colourful tree-like parts that we see are actually two appendages of the mouth used to trap food particles and bring them to the mouth. Oh, and the worm also uses them to breathe!

MY SUSTAINABLE NEW YEAR'S RESOLUTIONS! IN 2022, I WILL:

- Stop using single-use plastics

Run away from single-use plastics, of course! No balloons or disposable cutlery and cups, for instance. And you might even consider reducing plastics as part of your New Year's resolutions! Fill out the checklist here so you plan for yourself and for the planet!

il-Kamaleonti
