

## Field Observations

Use your senses (seeing, hearing, smelling, and touching) to observe the habitat around you. By learning about an area, you can also learn about the animals that call this place “home”! What to look for:

**What does the place look like?**

---

---

---

**What plants did you see?**

(shrubs, trees, grasses)

---

**What sounds did you hear?**

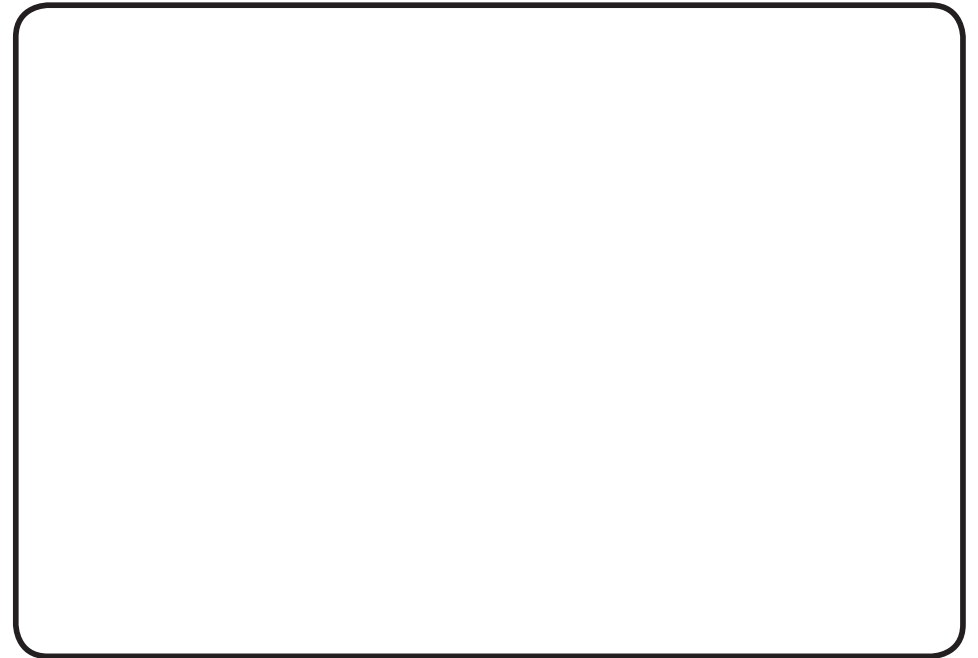

---

---

---

## Field Sketch

What new animal you discover today? Draw it in the space below.
