Tiżjin ħaj ... min-natura! Fi żmien il-Milied spiss inżejnu bil-weraq u l-frott aħmar tal-*holly*. Dawn ikunu tal-plastik għax f'Malta l-*holly* ma tikbirx. Imma flokha nistgħu nħawlu arbuxxell taż-żagħrun (*hawthorn*) li daż-żmien ikun mimli frott.

Ftit ilu kont ma' grupp studenti fir-riserva tal-Għadira. Aħna u mixjin qasam għasfur żgħir minn quddiemna. Rajnieh biss xi żewġ sekondi sa ma daħal sparat f'siġra folta tal-bruk.

"Dik kienet bufula sewda", għedtilhom.

"U ejja ser!" qalli wieħed mit-tfal, "Kif jista' jkun għaraftu daqs kif għadda sparat?"

Ftit wara kkonfermajt għax mis-siġra smajna ġejja l-għajta *ċxxx-ċxxx-ċxxx* tal-bufula.

It-tifel kellu raġun li l-għasfur bilkemm rajnieh, u veru li jien ma kellix ċans niflih sew. Imma l-għasafar (u ħafna annimali oħrajn) għandhom dik ix-xi ħaġa li jekk tkun ilek tarahom tibda tidra tagħrafha. L-istess kif aħna nidraw il-mixja ta' xi ħadd li nafu sew, bħal ħutna jew il-ġenituri. Jekk tarahom ġejjin bil-mixi mill-bogħod tagħrafhom mill-mixja ħafna qabel ma tagħrafhom minn wiċċhom. Veru?

L-istess l-għasafar. Kultant tagħrafhom minn kif itiru jew kif joqogħdu bilwieqfa, kif jiċċaqalqu jew jimxu.

Sintendi biex tidra tagħraf dawn l-affarijiet trid iż-żmien. Jien drajt nagħraf il-bufula sewda kemm għax hija komuni imma wkoll għax ili ħafna fil-BirdLife. Fi Klabb Ħuttaf mort ħafna ħarġiet fil-kampanja mal-membri u mal-leaders eċċellenti. Il-leaders jgħinuni ħafna biex nagħraf l-imġiba ta' għasafar differenti. Fl-aħħar l-għasfur tant tidrah li xi drabi biżżejjed tarah sekonda biex tagħrfu.

Hemm nies fil-BirdLife għadhom jgħallmuni sal-lum ... bħalma qed jitgħallmu sħabna l-berdwoċers żgħar u żgħażagħ fil-Young Birders Club (ara paġna 12).

Il-Milied it-Tajjeb lilkom u lill-familja tagħkom.

Narcissus *Narcissus tazetta*

In-narċis jimpressjonak għax sabiħ u jfuħ. Jiftaħ il-fjuri fl-eqqel tax-xitwa, meta ħafna pjanti jkunu għadhom ma ħolmux bil-fjuri. Minħabba li tant jolqot l-għajn xi nies għadhom jaqtgħu l-fjuri tan-narċis. Dal-vizzju jdgħajjef il-pjanta u jisraq l-ikel ta' ħafna insetti. Barra minn hekk fjuri maqtugħin ma jagħmlux żerriegħa.

Mus (bir-rix!)

Aron Tanti

Dan l-għasfur jgħidulu **mus**! Tafu għaliex? Għax għandu munqaru qisu xafra (anke bl-Ingliż jgħidulu *razorbill*). Il-mus huwa tajra tal-baħar li mhux soltu narawha Malta. Dawn l-għasafar ibejtu f'sisien max-xtut tan-North Sea, fin-naħa ta' fuq tal-Ewropa. Imma fix-xitwa jinfirxu u xi wħud jidħlu anke fil-Mediterran. Kultant, rari ħafna, xi wieħed jasal Malta wkoll.

Ftit ġimgħat ilu fil-Port il-Kbir tfaċċa dal-gustuż tar-ritratt. Qanqal ħafna interess fost il-berdwoċers, imma hu kien iktar moħħu biex joqgħod jogħdos forsi jqanqal xi mulett!

Mhux skont il-liġi!

Is-sena l-oħra l-kaċċaturi ngħataw biċċtejn art enormi fil-Miżieb u L-Aħrax tal-Mellieħa biex hemmhekk joqogħdu joqtlu l-għasafar bla ħadd ma jiċċekkja x'qed jagħmlu. Ħadd ma ħa gost kif din l-art publika nsterqet milli jgawdiha kulħadd. Il-BirdLife u għaqdiet oħra għamlu kawża l-qorti fuq dil-ħaġa. Ftit ġimgħat ilu l-qorti qablet magħna! Qalet li l-affarijiet la saru sew u lanqas skont il-liġi.

Jiġifieri l-Miżieb u l-Aħrax jista' jkompli jgawdihom kulħadd!

X'għandna mid-dinja?

Lanqas katapulti!

L-Amur falcon huwa seqer li jpassi mir-Russja u ċ-Ċina lejn l-Afrika t'Isfel. Waqt il-passa dawn l-għasafar jgħaddu mill-**Indja**, fejn kaċċaturi u nassaba joqtlu eluf minnhom. Bix isalvaw din l-ispeċi mill-qerda, l-awtoritajiet f'xi nħawi tal-Indja issa għamluha kontra l-liġi li tuża snieter, *airguns* u xbiek. Lanqas katapulti!

Tama għall-foresti

Il-**Brażil** fl-aħħar ħelsu minn president li kien qed jagħmel minn kollox biex jirvina l-forest Amazon. Il-president il-ġdid ħalef li jwaqqaf għal kollox il-qtugħ u l-ħruq ta' siġar fil-foresta. Mhux biss, imma ftiehem mal-mexxejja tal-Indoneżja u l-Congo biex flimkien iħarsu aħjar il-foresti tropikali f'pajjiżhom.

Jiddaħħlu lura...

Fuq medda art kbira fi **Spanja** qed jiddaħħlu lura speċi ta' annimali li darba kienu komuni, fosthom iż-żiemel selvaġġ, l-avultun iswed u l-linċa (*lynx*). L-art kbira 850km^2 (iktar minn darbtejn daqs Malta) u fiha muntanji, foresti, widien u xmajjar. Dax-xogħol huwa parti minn proġett eċitanti kbir jismu Rewilding Europe.

Ħajt ħabitat

Il-ħitan tal-ġnien tiegħi inħobb inħallihom naturali, jiġifieri bil-ġebla mikxufa mhux miksija. Hekk iktar narahom jixirqu mal-ġnien, imma wkoll għaliex anke ħajt jaf ikun ħabitat għall-annimali. Kultant xi biċċa tikħila żgħira tinqala' mill-fil ta' bejn il-ġebel. Jien ma naqbadx inkaħħal mill-ewwel għax hemm annimali żgħar li jagħmlu d-dar tagħhom fi spazji hekk.

Komma tal-ħarir

Wieħed minn dawn darba skoprejtu jiena u niċċekja l-fili għal sinjali ta' ħajja. Rajt ħaġa qisha għanqbuta imma mhux eżatt. Kienet bħal komma tal-ħarir ħierġa mill-fili, b'toqba fin-nofs u b'ħafna ħjut ħerġin mad-dawra. Bħas-soltu qabditni l-kurżità u bdejt noqgħod għassa kull darba li noħroġ fil-ġnien, biex nara min kienu l-annimali li kienu qed jagħmlu dawn il-forom strambi. Domt ma qtajt xewqti!

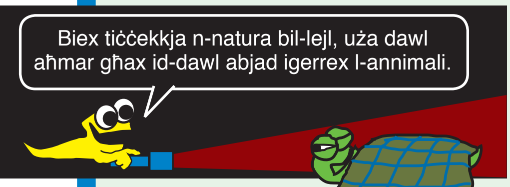
Desirée Falzon

Darba minnhom ġiet f'moħħi noħroġ fil-ġnien wara li jidlam. Min jaf, forsi s-sidien ta' dawk it-tubi joħorġu bil-lejl? U hekk kien, għax x'ħin immirajt it-torċ lejn dawk il-forom rajt... il-**brimba tat-tubu**! Dan ikun brimb attiv bil-lejl, li jinsġu għanqbuta forma ta' tubu biex binhar jinħbew fih. Imma fuq barra jinsġu bizzilla ta' ħjut fini mad-dawra kollha.

Ħjut jirtogħdu!

Jiena u nammira l-ħila tal-brimba li tinseġ dak it-tubu eleganti, għaddiet ħanfusa żgħira minn fuq dawk il-ħjut irqaq. F'salt ħarġet il-brimba u qabżet fuqha. Hemmhekk fhimt għaliex kienu dawk il-ħjut. Meta tgħaddi xi priża minn fuqhom, il-ħjut jirtogħdu ftit u l-brimba minn ġewwa tħoss iċ-ċaqliqa u tinduna li aktarx hemm ikla lesta biex tinqabad.

Waww! Mela sewwa għamilt ma ksejtx il-ħitan tal-ġnien, għax hekk hemm iktar ġnien, għax hekk hemm iktar *food chains* fil-ġnien tiegħi.



Forsi jaqbel nitbiegħed ftit!

HELLO ĦBIEB!

Illum xtaqt naqsam magħkom xi jfisser għalija ż-żmien tal-Milied.

Kemm hu żmien sabiħ! Id-djar kollha mixgħulin b'dawl ikkulurit, tiżjin mill-isbaħ u l-Bambin imdawwar bil-ġulbiena. Kull sena jien nikteb ittra lil San Niklaw fejn nitolbu diversi rigali. Is-sena l-oħra qatagħli xewqti u ġabli ġeru li kien ġie mwarrab minn sidu u semmejtu Ġiġi.

Din is-sena kelli ċans nirrifletti daqsxejn fuq xi jfisser il-Milied lil hinn mit-tiżjin u r-rigali. Sfortunatament mhux it-tfal kollha jistgħu jgawdu ż-żmien tal-Milied ġewwa darhom mal-familja minħabba li tkun ħakmithom xi marda kiefra. ☹ Dan il-ħsieb beda mis **26 ta' Diċembru** tas-sena l-oħra, meta kont qed nara l-Istrina. Intbaħt li l-isbaħ rigal li nista' nagħti jien hija donazzjoni żgħira lil **MALTA COMMUNITY CHEST FUND** biex jgħinu lil dawn in-nies fil-bżonn.

Imnalla tkun il-**BOV PIGGY BANK CAMPAIGN**, li kull sena jqassmu Piggy Banks ġewwa l-iskejjel biex inkunu nistgħu nagħtu donazzjoni. Infatti, is-sena l-oħra, bejn it-tfal kollha ta' Malta w Għawdex ġbarna madwar **€60,800**!

Din is-sena, fl-ittra tiegħi lil San Niklaw ma tlabtux rigali, iżda tlabtu biex jinkoraġġixxi lit-tfal kollha biex jagħtu aktar donazzjonijiet b'riżq l-Istrina. Apparti minn hekk, tlabt ukoll lill-Bambin biex jagħti s-saħħa lil dawk kollha li f'dawn iż-żminijiet għaddejjin minn żmien diffiċli minħabba xi marda li ħakmithom.

Filwaqt li nixtieq nawguralkom kollha l-isbaħ xewqat għal dan il-Milied, infakkarkom li l-isbaħ rigal li tista' tagħti huwa li tgħin lil ħaddieħor mingħajr ma tistenna xejn lura! ♥

Xewqat sbieħ għal Milied u Sena t-tajba

Sand dunes

Sand dunes are dynamic systems that form slowly when sand builds up as a cause of natural wave action, this process is called Accretion.

Dunes are home to vegetation which has adapted to the harsh conditions present, such as high temperatures, dryness, occasional inundation by seawater and accumulation of sand.

Sand dunes are split into **four zones,** the **embryo zone** where plants like the Sea Rocket (il-kromb il-baħar) are found. These species enable the establishment of other plants.

The second zone is the **mobile dune**, which is characterised by a low dune that is sparsely vegetated by plants such as the Sand Couch Grass (is-sikrana tar-ramel) and the Sea Holly (ix-xewk tar-ramel).

The **semi-consolidated dune** is found after this, it is characterised by the Carnation spurge (it-tengħud tax-xatt), the Sea Daffodil (il-pankrazju tal-baħar).

Finally, one finds the **fixed dune**, which is vegetated with a dense thicket of salt-tolerant shrubs, like the Grey Birdsfoot Trefoil (l-għantux tal-blat).

Over the years many sand dunes have been lost, thus rendering this habitat type one of the rarest and most threatened of our local ecosystems. As a result, access to these habitats is restricted.

Be nice to nature

Victor Falzon

Animals don't usually mind us taking their picture, but please let's show them some respect. If that caterpillar or that chameleon is in the shade, don't just pick it up and place it here and there "to get a better photo". Remember, animals are not toys, they don't like it when we mess about with them. They just want to get on with their business, to look for food or find a nice place where to be safe. Be nice to nature. Thank you!

Young Birders Club

Hello everyone, I'm Nathan Gambin. I'm 12 and I have been birdwatching since I was 9. Earlier this year I joined BirdLife's Young Birders Club to share birds with other enthusiasts my age and older leaders. Here are my birding highlights of the past few months.

The club organised an early morning ringing and birdwatching activity at the nature reserve. During the activity we watched **snipe**, **sedge warbler**, three **kingfishers**, **moorhens**, **coots** and some other waders like **wood sandpiper**, **green sandpiper** and **common sandpipers**. We also saw a flock of **little egrets** with a **cattle egret** among them, and also a **grey heron**. We left the first birdwatching hide and went to watch a live ringing session. During ringing, some **garden warblers**, a beautiful kingfisher and a few **willow warblers** were ringed. When we were about to leave, we spotted a **western Bonelli's warbler** which later was also caught and ringed. This was my first time seeing this scarce bird. We had to look at all the features in detail to make sure it is not the very similar eastern Bonelli's warbler.

Kemmuna Oct 2022

October brought my second outing this year to Kemmuna. I was invited by the ringers to spend a night at the ringing station with my father and I was so excited! On the first day at the station **starlings**, **song thrushes**, **robins**, **stonechats**, **black redstarts**, a **serin**, and lots of **chiffchaffs** were ringed. On the day we also released a [1]rehabbed [2]**stone curlew** that had been found injured in Malta, a beautiful wader species that spends the day feeding on garrigue and in fields. It was great to see it fly back into the wild. We were notified by a phone call that some of the group had found a **Pallas's leaf warbler** that had been ringed the day before. We ran to the spot and luckily no one missed this small yet very rare bird. In the early hours of the second day, club leader and ringer Nick Galea caught a **short-eared owl**. I had never seen one, so it was great to see this beautiful bird up close. I was impressed by its sharp talons and very soft feathers that make it such a silent but deadly flier! After we ringed and released the owl, we caught a few different species which we had not seen the day before such as **blackbird** and **chaffinch**. It was great fun to sleep at the Kemmuna Ringing station and to wake up surrounded by birds.

Airport 24 Nov 2022

I was told by club leader Chris Carbone to go to the airport to try and see wintering **Richard's pipits**, a rare species from the east. My father and I went and we managed to see these large pipits, plus **meadow pipits**, **skylarks**, **robins** and **stonechats**. But next day I was going to see an even more super bird...

"I'm now looking forward for some winter birding but even more to the upcoming spring migration!"

Go to page 3 for a great pic of a razorbill.

Grand Harbour 25 Nov 2022

A **razorbill** in Valletta! The razorbill is a marine bird that looks like a small penguin but this bird can fly. It was not hard to find as plenty of birders were looking for it. It was a big twitch! The bird spent more time diving underwater than actually staying above it. Razorbills catch fish, something I witnessed during my visit. They are very rare in the eastern Mediterranean Sea since they prefer colder coastal countries, so this was an exceptional sight in Malta.

[1]**rehabbed**. A sick or injured wild bird (or other animal) that has been nursed back to health. BirdLife Malta does a lot of this!
[2]**stone curlew**. In the new BirdLife International list, this species is now known as Eurasian thick-knee

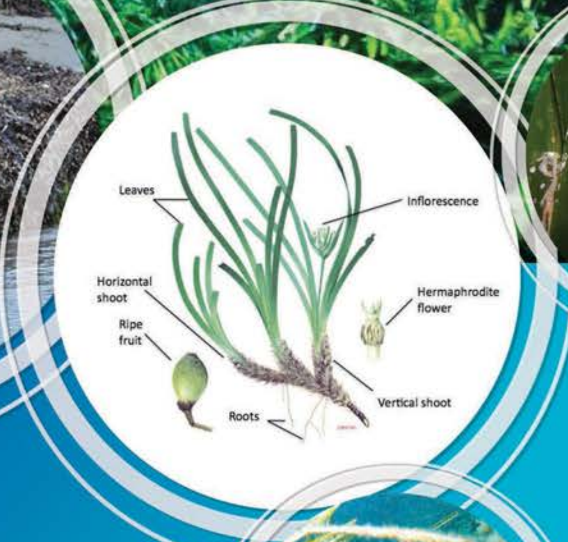
MALTA NATIONAL AQUARIUM

The Neptune grass, Posidonia oceanica, is a seagrass* widespread in the Mediterranean Sea. This is not an alga, as sometimes we call it, but a true grass, closely related to several species on land.

The leaves are ribbon-like, bright green and turning brown with age. During autumn old leaves are lost and they deposit on the shorelines.



Neptune grass produces simple flowers. Pollination* naturally occurs underwater along with movements in the water. Flowering occurs in September-October.

The fruit is free flowing in the water.

Seagrasses anchor themselves with roots* through the sediments. Among the roots a lot of sea animals hide and lay eggs. Can you spot the octopus?

Neptune grass creates habitat* for many other marine organisms. Colour all the animals that you can spot in the meadow.

WHAT CAN YOU FIND AT THE BEACH?

*GLOSSARY

HABITAT: it is a place that an animal lives. It provides the animal with food, water and shelter.

POLLINATION: when the pollen is transferred from a plant to another one.

ROOTS: they anchor the plant on the ground and take water and food from the soil.

SEAGRASS: flowering plant, which rows in a marine environment. As all the land plants seagrasses use the light to grow and in fact, most of them occur in shallow and coastal waters.

il-Farfett tal-Bużbież

- Il-farfett tal-bużbież huwa wieħed mill-ikbar friefet li naraw Malta.
- Huwa l-iktar farfett famuż mal-Maltin. F'pajjiżna dal-farfett għandu ħafna ismijiet, fosthom farfett tal-fejġel, farfett tal-lira, farfett tar-reġina u dundjan!
- Il-farfett tal-bużbież jismu hekk għax spiss ibid fuq il-bużbież. Din hija waħda mill-ftit pjanti li jiekol ix-[1]xagħat ta' dal-farfett.
- Bl-Ingliż jgħidulu *swallowtail* għax il-ġwienaħ ta' taħt għandhom żewġ ponot twal li jfakkruk f'denb il-ħuttafa (*swallow*).
- Xi studjużi jgħidu li l-farfett tal-bużbież ta' Malta huwa razza differenti mir-razza fil-bqija tal-Ewropa. L-isem xjentifiku sħiħ tiegħu huwa *Papilio machaon melitensis*. Mhux kulħadd jaqbel però.
- Il-farfett tal-bużbież iżur ħafna fjuri biex jixrob in-nektar. Nektar ikun ilma ħelu li lill-farfett jagħtih ħafna enerġija. Il-farfett tal-bużbież huwa dakkâr tajjeb.
- Il-farfett tal-bużbież ma jbidx il-bajd f'post wieħed imma 'l hawn u 'l hemm fuq weraq different. Il-bajd ikun ballun żgħir safrani.
- Ix-xagħat idum jikber xi 14-il ġurnata. Imbagħad jieqaf jiekol u jsir fosdqa. Iż-żmien fil-[3]fosdqa jvarja skont it-temperatura, minn ftit ġimgħat sa diversi xhur.
